SUBJECT INDEX—ALLERGY ABSTRACTS

A

Abortion, blood group incompatibilities as etiologic factor in, *31*
ACTH and cortisone, in allergy, *81*
effect of, on adrenal weight, *63*
on patterns of corticosteroid excretion in rabbits after prolonged treatment with, *11*
on phagocytosis, *61*
on plasma 17-hydroxycorticosteroid levels in man, *45*
fatal reaction to, *41*
simultaneous administration of cortical steroids and, *63*
treatment of ulcerative colitis with, *30*
Adenitis, immunization injections as cause of, *91*
Adjuvants, as aid to sensitization to staphylococcus in guinea pigs, *59*
Adrenocortical capacity, plasma level changes produced by intravenous ACTH as measure of, *45*
Agranulocytosis, phenylindanedione as cause of, *54*
Alkali, recovery of normal and eczematous skin from contact with, *67*
Allergic reactions, bee and wasp stings as cause of, *24*
Alveolar-arterial oxygen tension gradient in chronic pulmonary disease, *64*
Aminophylline, effect of, on cerebral blood flow, *28*
Anaphylactic reaction, administration of mixture of procaine penicillin, sodium penicillin, and dihydrostreptomycin as cause of, *55*
oral penicillin as cause of, *25*
duodenal intrinsic factor and gastric mucin as causative agents in, *30*
Anaphylactoid shock, lipemia-clearing factor produced during, *10*
Anaphylaxis in mice, effect of cobalt-60 gamma radiation on, *8*
passive, in dog, *25*
quantitative aspects of, in pertussis-vaccinated mice, *44*
Anti-egg albumin sera, previously unidentified antibody in, *10*
Antibodies, local fixation of, in guinea pig skin, effect of histamine on, *25*
paucity of, in Hodgkin's disease, *22*
protective and nonprotective forms of, elicited by nematodes, *31*
Antibody formation, evidence of a precursor in lymph node cells in, *26*
in mature rabbits, effect of early immunization on, *9*
in rat, effect of irradiation and hypophysectomy on, *13*
in x-irradiated rabbits, *13*
local, agglutination by lymphocytes in, *12*
production in rat, effect of hormones on, *48*
response, inhibition of, by use of massive doses of antigen, *77*
in rabbits, effect of massive antigen dosage on, *88*
of rabbits, effect of polyvinylpyrrolidone infusions on, *89*
Anticholinergic agent, piperphenamine, in treatment of hyperhidrosis, *4*
Antigen use of massive doses of, to inhibit specific antibody response, *77*
dosage, massive, effect of, on antigen retention and antibody response in rabbits, *88*
Antihistamines, antagonism between, in various strains of mice, *74*
comparative effectiveness of sustained release capsules and tablets of, *16*
effect of, on leucocytes, *62*
nonhemolytic transfusion reactions treated with, *91*
parenteral use of, in combination with hyposensitizing pollen injections, *66*
use of, for prevention of allergic and pyrogenic transfusion reactions, *91*
use of, in treatment of allergic deafness, *38*
vasoconstrictor effect of, on capillary bed, *62*
Arsenic, deleterious effects of, on asthmatic patients treated with, *51*
Arteriolitis allergica, case report of, *5*
Arteritis produced by passive sensitization, effect of nitrogen mustard on, *9*
Ascorbic acid, potentiation of epinephrine by, *62*
Aspirin, increased responsiveness to CO_2 induced by, *92*

Asthma, depression in, *66*
helium excretion from lungs as index of gas mixing in, *19*
infectious and atopic, C-reactive protein levels and A.S.O. titres as means of differentiating, *52*
Atopic dermatitis, wool as major cause of, *35*

B

BCG infection, effect of cortisone on, in guinea pig, *42*
BCG-vaccinated persons, comparative testing with various tuberculins in, *79*
Bedbug bites, anaphylactoid reaction from, *92*
Bee stings, reactions to, *24*
Blocking of delayed allergic reactions by plasma and lysed red blood cells, *14*
Blood and lymph node studies, in para-aminosalicylic acid sensitivity, *87*
Blood cell antigens, role of, in etiology of abortions, *31*
Bronchial asthma, sudden death in, *66*
treatment of, with intermittent positive pressure breathing, *2*
use of Demerol, in treatment of, *17*
oral compound F in treatment of, *33*
Brucella, standard antigen for agglutination testing in, *30*
Brucellergen skin test, correlation of, with Coombs' technique agglutination, *57*

C

C-reactive protein levels, means of differentiating infectious from atopic asthma, *52*
Capillaries, effect of directly applied antihistamines on, *62*
Capillary fragility, effect of roentgen irradiation and other types of injurious agents on, *90*
Cement, contact dermatitis due to chromium in, *7*
Cheilitis, coffee as cause of, *20*
Chlorprophenpyridamine maleate, comparative effectiveness of sustained release capsules and tablets of, *16*
Chromium, in cement, as cause of contact dermatitis, *7*
Chronic pulmonary disease, alveolar-arterial oxygen tension gradient in, *64*
Citrus flavinoids, use of, in treatment of respiratory infections, *30*
Coal tar, eczematous hypersensitivity to, *21*
Coffee, as specific excitant of cheilitis, *20*
Compound F, oral use of, in treatment of asthma, *33*
Conjunctivitis, allergic treatment of, with Cortogen and Chlor-Trimeton, *39*
vernal, *71*
Contact dermatitis, experimental, in guinea pigs, due to dinitrochlorobenzene, *4*
48-80 as cause of, *83*
Perazil ointment as cause of, *68*
platinum and related metals as cause of, *83*
Coombs' test, application of, in Brucella abortus infection, *57*
Cortical steroids, simultaneous administration of ACTH and, *63*
Corticosteroids, changes in patterns of secretion of, in rabbits, after prolonged treatment with ACTH, *11*
Corticosterone, effect of, on adrenal weight, *63*
Corticotropin and cortisone in allergy, *81*
effect of histamine on release of, in rats, *46*
use of, intranasally, in treatment of hay fever and allergic rhinitis, *38*
Cortisone and ACTH, effect on passive transfer of delayed hypersensitivity to 2,4-dinitrochlorobenzene in guinea pigs, *13*
antagonism to body temperature-reducing effect of histamine, *10*
and corticotropin, in allergy, *81*
death of two asthmatic patients during treatment with, *51*
effect of, on adrenal weight, *63*
on BCG infection in guinea pig, *42*
on blood and urinary histamine levels in liver disease, *28*
on eosinophils in rats exposed to cold, *15*
on phagocytosis, *61*
on plasma globulins in dogs, *90*
on plasma volume changes in egg-white injected rats, *12*
on reactivation of inactivated virus, *78*
on vascular reactivity, *63*
inhibition of binding of new histamine by, in rat tissues, *46*
lack of thrombo embolism from, in patients with vascular disease, *29*
local application of, in treatment of eczema, *34*
relative sensitivity of circulating eosinophils and capillary resistance to, *90*

Cortisone—Cont'd
treatment of ulcerative colitis with, *30*
use of, during penicillin treatment of syphilis in penicillin-hypersensitive patient, *20*
during pregnancy, *16*
in treatment of serum neuritis, *86*
Cortogen-Chlor-Trimeton, local therapy of allergic rhinitis with, *34*
treatment of allergic conjunctivitis with, *39*
Cortone, effect of, on adrenal weight, *63*
Cytology of tuberculin reaction in skin windows in man, *40*

D

Deafness, allergic, use of antihistamine in treatment of, *38*
Death, in bronchial asthma, *66*
Delayed allergic reactions, blocking effect of plasma and lysed red blood cells on, *14*
Demerol, use of, in treatment of bronchial asthma, *17*
Dermatitis, acute contact, experimentally produced, effect of x-rays on, *69*
experimental, in guinea pigs, produced by atmospheric fungi, *66*
in guinea pigs, experimental production of, by crude ether-soluble extracts of atmospheric molds, *66*
occupational, in government workers, *4*
waterless hand cleaners as cause of, *21*
Dermatoses, allergic, histopathology of, *21*
Dibucaine hydrochloride (Nuporal), fatal poisoning with, *86*
Dihydrostreptomycin, anaphylactic reaction following administration of, *55*
Dinitrochlorobenzene contact dermatitis, experimental, in guinea pigs, *4*
Drug sensitivity, swollen interphalangeal joints as manifestation of, *74*
Drug testing, oral method for determining possible drug sensitivity, *86*

E

Eczema, cortisone ointment in treatment of, *34*
crude coal tar as cause of, *21*
inhalant allergens as cause of, *85*
personality studies in, *36*
therapeutic effect of hydrocortisone acetate ointments in treatment of, *70*
treatment of, with hydrocortisone and anti-eczematous agents, *6*
Eczematous and normal skin, recovery of, from alkali contact, *67*
contact dermatitis, shoes as cause of, *69*
Egg-white injected rats, effect of cortisone on plasma volume changes in, *12*
Electrophoretic components of serum, relation of reagins to, *15*
Eosinophilic granuloma of lung, *15*
Eosinophils of blood, in rats, during prolonged exposure to cold, *15*
Ephedrine, prolongation of effects of, by beta-diethylaminoethyl diphenylpropylacetate, *47*
Epinephrine, effect of, on thyroid hormone level in blood, *11*
immediate blood cell count response to, in splenectomized dogs, *47*
potentiation of, by "vitamin P" substances, rutin, ascorbic acid, *62*
Ergotamine tartrate, rectal use of, in treatment of migraine, *8*
Erythema multiforme bullosum, phenylbutazone as cause of, *52*
Esophagus, rupture of, as complication in status asthmaticus, *51*
Expiratory-inspiratory-pause method in nebulization therapy, *18*

F

9 α-fluorhydrocortisone acetate, therapeutic assay of topical application of, in selected dermatoses, *70*
Fraction T (NY) tuberculin in testing for tuberculin sensitivity, *56*
Friedländer bacillus, role of, in chronic respiratory disease, *19*
Fungous spores and pollens, presence of, in KOH preparations of skin scrapings, *68*

G

Gel diffusion, technique for standardization of dust extracts by, *7*
Globulins, plasma, effect of cortisone on, in dogs, *90*
Glomerulonephritis, experimental production of, *28*
Glycoprotein levels in serum, effect of immunization on, in rabbits, *89*
Guillian-Barrés syndrome, PAS sensitivity as cause of, *43*

H

Hand dermatitis, role of soap and detergents as primary irritants in, *85*
as sensitizers in, *84*
Heinz bodies, in primaquine-sensitive erythrocytes, *61*
Helium, use of, to measure defective intrapulmonary gas mixing and emphysema, *19*

Hemolysis, relationship of cell age to hemolytic effect of primaquine, *61*
Hemolytic anemia in primaquine sensitivity, mechanism of, *60*
Herpes simplex, Kaposi's varicelliform eruption caused by, *5*
Histamine, blood level, effect of cortisone and methyl testosterone on, in case of liver disease, *28*
body temperature-reducing effect of, in pertussis-inoculated and uninoculated mice, *10*
effect of, on corticotropine release in rats, *46*
effect of, upon local fixation of antibodies in guinea pig, *25*
inhibition of binding of, by cortisone, in rat tissues, *46*
levels of, and relation to pruritus in liver disease, *28*
mast cells as important source of, *27*
release of, from mast cells, *45*
Histamine-liberators, effects of, on mast cells of rat, *45*
Histamine-releasing drug, 48-80, allergic contact dermatitis due to, *83*
Histamine toxicity in various strains of mice, effect of antihistamines on, *74*
Histopathology of allergic dermatoses, *21*
Hodgkin's disease, cutaneous anergy in, *22*
Hydralazine, febrile syndrome following therapy with, *24*
Hydrocortisone acetate, use of, in treatment of allergic skin diseases, *70*
effect of, on adrenal weight, *63*
on antibody production in rat, *48*
on phagocytosis, *61*
intravenous, clinical use of, *59*
rapid improvement in bronchial asthma with use of, *82*
local use of, *3*
pharmacologic fate of, in man, *27*
topical, use of, in treatment of Rhus dermatitis, *67*
Hyperhidrosis, treatment of, with piperphenamine, new anticholinergic agent, *4*
Hyperpyrexia, hydralazine as cause of, *24*
Hypophysectomy, effect of, on phagocytosis, *61*
Hyposensitization, in bee and wasp hypersensitivity, *24*

I

Immunization adenitis, *91*
Infantile diarrhea, generalized Shwartzman phenomenon as factor in death from, *78*
Inhalants, eczema caused by, *85*
Inhalation therapy, epinephrine proved safe in, *82*
Insulin, local skin lesions resulting from improper administration of, *41*
Insulin-resistant diabetes after total pancreatectomy, *42*
Intermittent positive pressure breathing, in respiratory phase, in treatment of bronchial asthma, pulmonary emphysema, and bronchiectasis, *2*
Irradiation of recipient rabbits, effect of, on antibody formation following lymph node cell transfer, *14*
Isoniazid therapy, effect of, on tuberculin allergy, *56*
toxic reactions to, *53*

K

Kaposi's varicelliform eruption, report of two cases due to herpes simplex, *5*

L

Lamb's-quarter, summer blooming, hay fever caused by, *83*
Lens, vitreous and aqueous proteins, analysis of, by electrophoretic and gel diffusion techniques, *73*
Leukocyte lysis, in tuberculous rabbit serum, *39*
Lipemia-clearing factor, production of, during anaphylactoid shock, *10*
Liver, disease of, as related to histamine levels, *28*
Löffler's reaction to para-aminosalicylic acid, *73*
syndrome following use of vaginal cream, *24*
ocular manifestations in, *37*
Lung blockage, physiologic consequences of, *46*
Lupus erythematosus, hypothesis of pathogenesis of, *12*
Lymphocytes, agglutination by, in local antibody production, *12*

M

Mast cells, release of histamine by, *27*
release of histamine from, *45*
Ménière's disease, management of, *39*
Mercurial diuretics, reactions to, *74*
Migraine, treatment of, by rectal use of ergotamine and caffeine alkaloid, *8*
Mold extracts, experimental contact dermatitis produced by, in guinea pigs, *66*

N

Nasal allergy, treatment of, with intranasal corticotrophin, *38*
Nebulization therapy by expiratory-inspiratory-pause method, *18*
Nematodes, protective antibody elicited by secretions of, *31*
Neuritis due to serum, cortisone treatment of, *86*
Nitrogen mustard, effect of, on experimental production of arteritis by passive sensitization, *9*
Nonspecific hyperergic reactivity at site of tuberculin reaction, *58*
Nummular eczema, etiology of, *6*

O

Ocular manifestations in Löffler's syndrome, *37*
Oleoresin fractions, use of, in treatment of plant contact dermatitis, *36*
Ophthalmology, common manifestations of allergy in, *39*
Oxytetracycline hydrochloride, side reactions to, *23*

P

Pamine, aerosol use of, in bronchial asthma and emphysema, *50*
Pancreatectomy, insulin-resistant diabetes following, *42*
Para-aminosalicylic acid, as cause of Löffler's syndrome, *73*
blood and lymph node studies in patients hypersensitive to, *87*
fatal allergic reactions to, *54*
Guillain-Barrés syndrome caused by, *43*
toxic reactions to, *53*
Parephyllin, lack of effect of, on kidney functions and cerebral blood flow, *29*
Passive transfer of 2,4-dinitrochlorobenzene sensitivity in guinea pigs, effect of ACTH and cortisone on, *13*
Penicillin, benzathine type, as cause of severe prolonged reaction, *58*
fatal reaction to, *43*
methods of desensitization to, *23*
oral, acute anaphylactic reaction following use of, *25*
S^{35}-labeled, autoradiographical distribution and excretion studies with, *11*
Penicillin reactions, use of procaine amide in treatment of, *72*
Perazil ointment, incidence of sensitization following topical application of, *68*
Pericarditis, acute, associated with serum sickness, *8*
Phagocytosis, effect of hypophysectomy, cortisone, hydrocortisone, corticosterone, and ACTH on, *61*
Phenylbutazone, fatal reaction to, *52*
Phenylindanedione, agranulocytosis caused by, *54*
Piperazine citrate, anaphylactogenic properties of, *72*
Piperphenamine, hyperhidrosis treated with, *4*
Pituitary, role of, in antibody formation, *13*
Plant contact dermatitis, treatment of, by means of oral hyposensitization with oleoresins, *36*
Plasma volume changes in egg-white injected rats, effect of cortisone on, *12*
Platinum, contact dermatitis from, *83*
Poliomyelitis, incidence of, among allergics, *92*
Pollen therapy, comparative effectiveness of purified protein extracts and crude pollen extract in, *18*
Pollen ultrafiltrates, therapeutic value of, *18*
Pollens and fungus spores, in KOH skin preparations, *68*
Polyarteritis, hydralazine as cause of, *24*
Polyvinylpyrrolidone, effect of infusions with, on immune response in rabbits, *89*
Prantal, allergic diseases treated with, *2*
Prednisone, treatment of selected dermatoses with, *70*
and prednisolone, major undesirable side effects resulting from, *76*
Pregnancy, use of cortisone during, *16*
Pressor drugs, safety of, in inhalation therapy, *82*
Primaquine hemolysis of erythrocytes, Heinz bodies in, *61*
relationship of cell age to hemolytic effect of, *61*
sensitivity, mechanism of, *60*
Procaine, oral treatment of pruritus with, *35*
penicillin, accidental intravenous administration of, as cause of severe reactions to, *57*
anaphylaxis in cats and man produced by, *57*
severe reactions in man, *57*
Pronestyl, use of, in treatment of penicillin allergy, *72*
Pruritus, larvae of crab as cause of, *22*
treatment of, with oral procaine, *35*

Pruritus—Cont'd
vulvae, pollen infection as cause of, *65*
Purified protein derivative, comparison of, with Old Tuberculin, *55*
Pyribenzamine, metabolism and excretion of, *75*
method for quantitative assay of, *75*

R

Ragweed antigen, identification of fractions of, with gel diffusion technique, *49*
Reactions, untoward, to sodium dehydrocholate, *44*
Reagins, relation of, to electrophoretic components of serum, *15*
Respiratory disease, Friedländer bacillus as etiologic factor in, *19*
Respiratory infections, treatment of, with citrus flavinoids, *30*
Rheumatic fever, antibody response to diphtheria toxoid following, *47*
Rhinitis, allergic, treatment of, with Cortogen-Chlor-Trimeton suspension, *34*
Rhus dermatitis, treatment of, with topical hydrocortisone, *67*
Roentgen irradiation, effect of, on capillaries, *90*
Rutin, potentiation of epinephrine by, *62*

S

Sandostene, clinical evaluation of, *75*
Serum neuritis, treatment of, with cortisone, *86*
Serum sickness, pericarditis in, *8*
Shoes, contact dermatitis caused by, *69*
Shwartzman phenomenon, as cause of death in infantile diarrhea, *78*
comparison of various aspects of, with tuberculin-type bacterial reactions, *75*
reaction, fatal, during antibiotic therapy, *31*
localized, effect of Dicumarol on, *20*
Smoker's respiratory syndrome, *3*
Soaps and detergents, role of, in hand dermatitis, *84, 85*
Sodium dehydrocholate, reactions to, *44*
Streptococcal toxin, effect of, on tuberculin sensitivity in guinea pigs, *40*
Sulfonamides, generalized and fixed drug reaction from, *86*
Sweat, human, urticariogenic properties of, *3*
Syphilis, treatment of, with cortisone and penicillin in penicillin-sensitive patient, *20*

T

Terramycin, side reactions to, *23*
Thromboembolism, lack of importance of cortisone as factor in etiology of, *29*
Thyroid hormone level in blood, effect of epinephrine on, *11*
Transfusion reactions, antihistaminics for prevention of, *91*
antihistamine in treatment of, *91*
Tromexan, dermatitis following therapy with, *6*
Tubercle bacillus, extraction of immunity factor from, by methanol, *80*
sensitization, correlation of plasma protein fractions with immediate and delayed cutaneous sensitivity in, *79*
Tuberculin reaction, cytology of, in man, *40*
effect of isoniazid therapy on, *56*
nonspecific hyperergic reaction in, *58*
similarity of, to Shwartzman phenomenon, *75*
sensitivity, in guinea pigs, influence of streptococcal toxin on, *40*
testing with purified tuberculin fractions in, *56*
Tuberculins, comparative testing with, in BCG-vaccinated and unvaccinated persons, *79*
comparison of potencies of several types of, *55*
Tuberculous rabbit serum, leukocyte lysis with tuberculin in, *39*

U

Ulcerative colitis, treatment of, with cortisone and ACTH, *30*
Urticaria, incidence of dermographism in, *36*
and angioedema, etiologic factors in, *5*
Urticariogenic properties of human sweat, *3*

V

Vascular reactivity, effect of cortisone on, *63*
Venom of Ammodytes viper, antigenic composition of, *16*
Vernal conjunctivitis, *71*
Viral disease, allergy to chemical products as possible cause of pathological findings in, *87*
Virus infection, influenzal, reactivation by cortisone of inactivated virus in, *78*

W

Wasp stings, reactions to, *24*
"Wax" of *Mycobacterium tuberculosis* as adjuvant in sensitization of guinea pigs with staphylococcus, *59*
Wool, dominant causative factor in atopic dermatitis, *35*

X

X-ray therapy, effect of, on experimentally produced acute contact dermatitis, *69*

Z

Zoris, dermatitis caused by, *37*
